

# Twisted Pretzel Dogs Cooking Procedures

Allow product to thaw in refrigerator/cooler.

## For Heating in Convection Oven:

Set temperature to 325 degrees. Cook product in package (un-vented) on aluminum pizza tray for 23 minutes.

Product may be cooked at a temperature up to 425 degrees at 12-15 minutes.

Product is best at an internal temperature of 160 degrees.

## For Heating in a Closed Warmer: (e.g. Pierre Case)

Set temperature setting between 4 and 5, (closer to 5)

At end of 2 hours, internal temp is 140 degrees.

## Notes:

The product is best when consumed within two hours of being ready, but is still good for up to four hours.

Packaging will always be cool to the touch and the product will not stick to the package due to a special film inside the package.

This item cannot be heated on a roller grill.
